Conflict Resolution in School Contexts May 19 2021 Complexity and interculturalism characterize the worldwide societies. Though for many aspects these multiple forms convey a positive meaning, from other points of view a problematic communication seems to generate the increasing of conflicts. According to several perspectives of study, conflict is considered as something that cannot be avoided; it is constantly present and it poses relevant pedagogical problems. The focus is less on individual variables, and more on the environmental factors

which interact and play a crucial role in the diverse situations of the social life. Alternatively, conflict is also considered as an opportunity for personal changes, structured groups and organizations affected. The purpose of this book is to describe conflict resolution by analyzing theoretical aspects that support research and practice. Empirical results present the efforts made in school contexts to prevent aggression and violence. Finally, discussion is open to implement good practices in peace education and provide valuable experiences for a new democratic culture in tune with the sense of our shared responsibility. The book

includes the Questionnaire for teachers.

**Tools for Conflict Resolution** Jan 15 2021 Have you been searching for a way to resolve conflict that doesn't involve a series of ten or more steps? Do you think that perhaps a key to conflict resolution must come from within? How can teachers and pre-service teachers help their students learn and use strategies for conflict resolution? Tools for Conflict Resolution is a practical method for teaching conflict resolution skills to students in grades K-12. Conflict is a part of everyone's life. It is the authors' belief that if each student is given tools for handling conflict, and these tools are used each time conflict arises that soon students become proficient conflict managers. This book begins with a chapter, which introduces Peter Senge's five disciplines: Personal Mastery, Mental Models, Shared Vision, Team Building, and Systems Thinking. After reading this chapter, the reader is able to embrace the five disciplines and begin practicing the adult level. As teachers, we teach from who we are. The rest of the book is filled with actual lesson plans, which are directly tied to the Multiple Intelligences Theory and are developmentally appropriate for students. Case studies, role- plays, skits, literature, songs, and co-operative learning activities are the primary instructional methods used to teach students conflict resolution skills. An annotated bibliography is included to assist teachers in extending lessons. These lessons may be taught during Social Studies as a unit on character education or could be used during a guidance class.

**Research for Social Justice** May 07 2020 Individuals are equipped with a wide range of knowledge that enhances their employability, health, family life, and social engagement. On this basis, providing equality for all has been set to be achieved as one of the United Nations sustainable development priorities. However, the international understandings are not only of what equality and inclusivity entail but also the social vision to achieve social justice. Best practices provide a meaningful cross-national discussion with respect to the following topics: power relations within research, social inequalities in society, science research for social justice, the redefinition of the notion of social justice, education for social justice, spatial justice, the research of gender and marginalized groups,

the re-conceptualization of the epistemological foundation of research, hegemonic discourses on research, science technology for social justice and welfare, as well as culture and social justice. This edited book aims to provide a new perspective for other benefits of research because generally, the research carried out only aims to answer scientific problems and often override aspects of humanities. In response to these concerns, the book attempts to re-map the main objectives of the research. The authors in this book offer new perspectives, especially in formulating the purposes of the studies they will perform. Therefore, this book presents a unique review of research with a variety of approaches that are coherent with the state of society in the world, followed by eleven scopes of various cases from a variety of perspectives that highlight theoretical and methodological questions about research and social justice. This book presents outstanding applications through multiple types of approaches that are relevant to the current context of

world community issues. The articles in this book will be of interest to undergraduate and graduate students, as well as researchers who are interested in the social field, especially research for social justice.
