Clinical Practice Guidelines We Can Trust Aug 02 2020 Advances in medical, biomedical and health services research have reduced the level of uncertainty in clinical practice. Clinical practice guidelines (CPGs) complement this progress by establishing standards of care backed by strong scientific evidence. CPGs are statements that include recommendations intended to optimize patient care. These statements are informed by a systematic review of evidence and an assessment of the benefits and costs of alternative care options. Clinical Practice Guidelines We

Can Trust examines the current state of clinical practice guidelines and how they can be improved to enhance healthcare quality and patient outcomes. Clinical practice guidelines now are ubiquitous in our healthcare system. The Guidelines International Network (GIN) database currently lists more than 3,700 guidelines from 39 countries. Developing guidelines presents a number of challenges including lack of transparent methodological practices, difficulty reconciling conflicting guidelines, and conflicts of interest. Clinical Practice Guidelines We Can Trust explores questions surrounding the quality of CPG development processes and the establishment of standards. It proposes eight standards for developing trustworthy clinical practice guidelines emphasizing transparency; management of conflict of interest ; systematic review--guideline development intersection; establishing evidence foundations for and rating strength of guideline recommendations; articulation of recommendations; external review; and updating. Clinical Practice Guidelines We Can Trust shows how clinical practice guidelines can enhance clinician and patient decision-making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter, instead of implementing a one size fits all approach to patient care. This book contains information directly related to the work of the Agency for Healthcare Research and Quality (AHRQ), as well as various Congressional staff and policymakers. It is a vital resource for medical specialty societies, disease advocacy groups, health professionals, private and international organizations that develop or use clinical practice guidelines, consumers, clinicians, and payers.

Regional Mechanisms and International Security in Latin America Sep 27 2022 A great diversity of points of view on international security, one of the most current subjects in the area of international relations, coexist in Latin America and the Caribbean. This region is immersed in an interesting debate in which reticence and enthusiasm coexist and confront themselves in order to enlarge the functions of regional mechanisms of security, or to evaluate experiences acquired either through UN action or recent tendencies of the Security Council. The center of debate is also found in the impossible to ignore role of the United States. Does the end of the Cold War modify the U.S. interests in Latin America in the field of security? Should existing mechanisms of collective security in the region be strengthened? Or should new alternatives be found? How far is a shared agenda for security, not only with the United States but also between the countries in Latin America itself, and among them and the Caribbean, possible or desirable? How acceptable are the new tendencies of the multilateral organizations in the field of security of the countries in the region? These are some of the questions that this book deals with from different points of view. It presents a new perspective on the contemporary debate over international security in Latin America and the Caribbean.

Systemic Banking Crises Database Sep 03 2020 We update the widely used banking crises database by Laeven and Valencia (2008, 2010) with new information on recent and ongoing crises, including updated information on policy responses and outcomes (i.e. fiscal costs, output losses, and increases in public debt). We also update our dating of sovereign debt and currency crises. The database includes all systemic banking, currency, and sovereign debt crises during the period 1970-2011. The data show some striking differences in policy responses between advanced and emerging economies as well as many similarities between past and ongoing crises.

Trade-offs in Bank Resolution Apr 22 2022 This SDN revisits the debate on bank resolution regimes, first by presenting a simple model of bank insolvency that transparently describes the trade-off involved between bail-outs, bail-ins, and larger capital buffers. The note then looks for empirical evidence to assess the moral hazard consequences of bail-outs and the systemic spillovers from bail-ins.

Transaction Planning Using Rules on Jurisdiction and the Recognition and Enforcement of Judgments Sep 22 2019 Also available as an e-book Private international law is normally discussed in terms of rules applied in litigation involving parties from more than one State. Those same rules are fundamentally important, however, to those who plan crossborder commercial transactions with a desire to avoid having a dispute arise — or at least to place a party in the best position possible if a dispute does arise. This makes rules regarding jurisdiction, applicable law, and the recognition and enforcement of judgments vitally important to contract negotiations. It

also makes the consideration of transactional interests important when developing new rules of private international law. These lectures examine rules of jurisdiction and rules of recognition and enforcement of judgments in the United States and the European Union, considering their similarities, their differences, and how they affect the transaction planning process.

EDI and the Law May 23 2022 No direct case law exists for electronic data interchange. The very nature of this new technology challenges traditional legal concepts. In this fast-moving field practice is far ahead of the law itself and in EDI even the absence of paper raises difficulties. The legal issues of paperless trading need to be sorted out quickly as EDI is adopted widely. This new book explains the current situation.

Teaching Empathy and Conflict Resolution to People with Dementia Nov 24 2019 The way in which dementia is understood and treated is changing, with a growing focus on the individual's experience and person-centred approaches to care. Introducing a new model of dementia care that reflects on the role of a person with dementia within a community and their relationships, this guide for professional and family caregivers demonstrates how to facilitate positive relationships for peaceful living. By understanding the cognitive and physical challenges that older adults with dementia face, caregivers can practice empathic care that affords people with dementia increased freedom of expression and independence. Included here are techniques for conflict resolution that enable people with dementia to be active and self-initiating in times of distress and disruption. Looking at the basics of respect, empathy, and mindfulness, this book also provides hands-on training for employing these virtues in practice with a number of exercises to help achieve the goal of peaceful independent living.

Nonperforming Loans in Asia and Europe-Causes, Impacts, and Resolution Strategies Dec 26 2019 This book traces trends in nonperforming loans (NPLs) during and after financial crises in Asia and Europe. It examines the impact of high NPLs, compares the effectiveness of resolution strategies, and explores policy considerations. The volume highlights the need for decisive and comprehensive policy action to help manage NPLs swiftly. It explores the legal and economic conditions conducive to NPL resolution, the role of asset management companies, the potential of technological solutions, and the importance of regional financial cooperation. It provides

insights to help policy makers chart a course through the financial and economic fallout of the coronavirus disease (COVID-19) pandemic to recovery and sustained financial stability in Asia, Europe, and beyond. The publication is a collaborative project of the Asian Development Bank, the European Central Bank, and the Joint Vienna Institute.

The Western Confluence Dec 06 2020 For 150 years, the American West has been shaped by persistent conflicts over natural resources. This has given rise to a succession of strategies for resolving disputes-prior appropriation, scientific management, public participation, citizen ballot initiatives, public interest litigation, devolution, and interest-based negotiation. All of these strategies are still in play, yet the West remains mired in gridlock. In fact, these strategies are themselves a source of conflict. The Western Confluence is designed to help us navigate through the gridlock by reframing natural resource disputes and the strategies for resolving them. In it, authors Matthew McKinney and William Harmon trace the principles of natural resource governance across the history of western settlement and reveal how they have met at the beginning of the twenty-first century to create a turbid, often contentious confluence of laws, regulations, and policies. They also offer practical suggestions for resolving current and future

disputes. Ultimately, Matthew McKinney and William Harmon argue, fully integrating the values of interest-based negotiation into the briar patch of existing public decision making strategies is the best way to foster livable communities, vibrant economies, and healthy landscapes in the West. Relying on the authors' first-hand experience and compelling case studies, *The Western Confluence* offers useful information and insight for anyone involved with public decision making, as well as for professionals, faculty, and students in natural resource management and environmental studies, conflict management, environmental management, and environmental policy.
