Democracies Divided Dec 18 2021 “A must-read for anyone concerned about the fate of contemporary democracies.”—Steven Levitsky, co-author of *How Democracies Die* Why divisions have deepened and what can be done to heal them As one part of the global democratic recession, severe political polarization is increasingly afflicting old and new democracies alike, producing the erosion of democratic norms and rising societal anger. This volume is the first book-length comparative analysis of this troubling global phenomenon, offering in-depth case studies of countries as wide-ranging and important as Brazil, India, Kenya, Poland, Turkey, and the United States. The case study authors are a diverse group of country and regional experts, each with deep local knowledge and experience. *Democracies Divided* identifies and examines the fissures that are dividing societies and the factors bringing polarization to a boil. In nearly every case under study, political entrepreneurs have exploited and exacerbated long-simmering divisions for their own purposes—in the process undermining the prospects for democratic consensus and productive governance. But this book is not simply a diagnosis of what has gone wrong. Each case study discusses actions that concerned citizens and organizations are taking to counter polarizing forces, whether through reforms to political parties, institutions, or the media. The book’s editors distill from the case studies a range of possible ways for restoring consensus and defeating polarization in the world’s democracies. Timely, rigorous, and accessible, this book is of compelling interest to civic activists, political actors, scholars, and ordinary citizens in societies beset by increasingly rancorous partisanship. **The Harmony of the World** Apr 22 2022 The authors have presented and interpreted Johannes Kepler’s Latin text to English readers by putting it into the kind of clear but earnest language they suppose Kepler would have used if he had been writing today.

Nations and Firms in the Global Economy Apr 29 2020 Conclusion: 13.

Uniting a Divided City Jul 25 2022 For many, Johannesburg resembles the imagined spectre of the urban future. Global anxieties about catastrophic urban explosion, social fracture, environmental degradation, escalating crime and violence, and rampant consumerism alongside grinding poverty, are projected onto this city as a microcosm of things to come. Decision-makers in cities worldwide have attempted to balance harsh fiscal and administrative realities with growing demands for political, economic and social justice. This book investigates pragmatic approaches to urban economic development, service delivery, spatial restructuring, environmental sustainability and institutional reform in Johannesburg. It explores the conditions and processes that are determining the city's transformation into a cosmopolitan metropole and magnet for the continent.

Providing a Foundation for Teaching Mathematics in the Middle Grades Oct 24 2019 This book provides middle school teachers with a firm pedagogical foundation based on the manner in which students learn the mathematics being taught.

Solidarity Divided Oct 16 2021 The US trade union movement finds itself on a global battlefield filled with landmines and littered with the bodies of various social movements and struggles. Candid, incisive, and accessible, this text is a critical examination of labour's crisis and a plan for a bold way forward into the 21st century.

International Economic Law and the Digital Divide Nov 05 2020 In this well researched book, the author explains the digital divide and its repercussions for developed and developing nations. In his view, the overzealous disciplining at the WTO-level of instruments affecting trade notwithstanding, developing countries still have important tools in their hands (intellectual property protection, competition policies, tax regimes) that can help them attract foreign direct investment, a crucial ingredient in reducing the current divide. Borrowing from the institutions that we have seen developed in international economic relations is highly recommended as well. In short, whether the divide will continue to persist or, conversely, whether it will gradually become a historical feature of international relations critically depends on the political will on both sides (of the divide). The author makes a persuasive argument to support his thesis, empirically researched and with strong foundations in theory. Petros C. Mavroidis, Columbia Law School, US and University of Neuch'el, Switzerland This path-breaking book focuses on the WTO, e-commerce and information communications technologies. It sheds light on how international economic law can be used as a tool in the application of technological processes to facilitate development in developing countries. Rohan Kariyawasam begins by looking predominantly at the rise of international digital networks. He offers an introduction to the networks used in the delivery of electronic products and network-based transactions, and the application of WTO law to the sector. He then suggests how developing countries can use economic law and technology to tap digital markets in the developed world. The book also argues that the advance of basic living standards in some developing countries can be achieved through technological processes, but that this cannot happen without such states paying greater attention to the enforcement of economic, social and cultural rights at home. Picking up the property rights debate (including through bilateral trade), the author argues that ensuring beneficial technology transfer will require balancing foreign investor rights to protect intellectual property. It will also involve restrictions imposed by competition law and WTO surveillance to check the possible misuse of market power by multinational companies. The proposed mixture of measures should, he argues, provide incentives for Foreign Direct Investment. Providing a thorough review of the application of WTO law to the telecommunications sector and the regulation of international digital networks, this book will be of great interest to postgraduate students in international economic law and international development law, as well as those interested in human rights law and technology. It will also appeal to government regulators, NGOs and technologists interested in ICTs and development.

A Divided World Aug 26 2022 The social structure of the Apinaye, a Central Brazilian Indian tribe, has puzzled anthropologists for forty years. Now, in this long-awaited book previously unavailable in English, Roberto Da Matta comprehensively describes Apinaye social life and the dualistic conceptual structure that underlies it. Special attention is given to the organization of daily and ceremonial life, the ideological aspects of kinship, the political system, and the confrontation between the Apinaye and the national Brazilian society. Da Matta then enlarges his account of the Apinaye to suggest a general interpretation of

Indian culture in Central Brazil.

Globalization and the City Aug 22 2019 Extensive case studies of cities such as Sydney, Seoul and Miami are provided.

Sociology and Social Justice May 31 2020 Published in association with the International Sociological Association, this is a critical exploration of social justice and democratization, human rights, and social and economic inequality.

Deepening Local Democracy in Latin America Jan 27 2020 "Addresses the question of why institutions meant to attract citizen participation succeed in strengthening civil society and improving state responsiveness and transparency in some places, but fail in others. Focuses on urban politics in Porto Alegre (Brazil), Montevideo (Uruguay), and Caracas (Venezuela)"--Provided by publisher.

Transcending the Culture–Nature Divide in Cultural Heritage Jul 13 2021 While considerable research and on-ground project work focuses on the interface between Indigenous/local people and nature conservation in the Asia-Pacific region, the interface between these people and cultural heritage conservation has not received the same attention. This collection brings together papers on the current mechanisms in place in the region to conserve cultural heritage values. It will provide an overview of the extent to which local communities have been engaged in assessing the significance of this heritage and conserving it. It will address the extent to which management regimes have variously allowed, facilitated or obstructed continuing cultural engagement with heritage places and landscapes, and discuss the problems agencies experience with protection and management of cultural heritage places.

Divided World, Divided Class Nov 17 2021 *Divided World* *Divided Class* charts the history of the 'labour aristocracy' in the capitalist world system, from its roots in colonialism to its birth and eventual maturation into a full-fledged middle class in the age of imperialism. It argues that pervasive national, racial and cultural chauvinism in the core capitalist countries is not primarily attributable to 'false class consciousness', ideological indoctrination or ignorance as much left and liberal thinking assumes. Rather, these and related forms of bigotry are concentrated expressions of the major social strata of the core capitalist nations' shared economic interest in the exploitation and repression of dependent nations. The book demonstrates not only how redistribution of income derived from super-exploitation has allowed for the amelioration of class conflict in the wealthy capitalist countries, it also shows that the exorbitant 'super-wage' paid to workers there has meant the disappearance of a domestic vehicle for socialism, an exploited working class. Rather, in its place is a deeply conservative metropolitan workforce committed to maintaining, and even extending, its privileged position through imperialism. This second edition includes new material such as data on growing inequality between the richest and poorest countries; data illustrating rising real wages in Imperial Britain; explication of the concepts of value, monopoly capital and unequal exchange and their ramifications for the global class structure; discussion of social imperialism on the left; responses to critiques surrounding the thesis of mass embourgeoisement through imperialism; as well as further information on a range of subjects.

Learning to Divide the World Sep 03 2020 "The barbarian rules by force; the cultivated conqueror teaches." This maxim from the age of empire hints at the usually hidden connections between education and conquest. In *Learning to Divide the World*, John Willinsky brings these correlations to light, offering a balanced, humane, and beautifully written account of the ways that imperialism's educational legacy continues to separate us into black and white, east and west, primitive and civilized.

The Portable Commentary. The Holy Bible ... with ... Explanatory Notes, Selected ... by the Rev. Ingram Cobbin Mar 29 2020

The Post-Pandemic World Sep 15 2021 The Covid-19 pandemic is a repeating biophysical shock yet one for which our current socio-economic structure was not prepared. Climate change, scarcity, depletion of natural resources, and the inevitable transition to renewable energy are one time events. Taken together, they present an existential threat to human society. This book is a guide to navigating these megatrends, which confront us now but whose consequences will unfold over decades. By presenting clear options on the path to a renewable energy future, this book gives readers a broad perspective as well as detailed, well-illustrated examples to weigh in making decisions which will secure stability and prosperity for their families, their communities and their nations.

U.S. News & World Report Feb 26 2020

A Divided World Oct 28 2022 Roosevelt's New Deal introduced sweeping social, political and cultural change across the United States, which the Hollywood film community embraced enthusiastically. This book examines some of the important programs of the New Deal and the subsequent response of the Hollywood film community.

A World Divided Jan 07 2021 A global history of human rights in a world of nations that grant rights to some while denying them to others Once dominated by vast empires, the world is now divided into some 200 independent countries that proclaim human rights—a transformation that suggests that nations and human rights inevitably develop together. But the reality is far more problematic, as Eric Weitz shows in this compelling global history of the fate of human rights in a world of nation-states. Through vivid histories from virtually every continent, *A World Divided* describes how, since the eighteenth century, nationalists have established states that grant human rights to some people while excluding others, setting the stage for many of today's problems, from the refugee crisis to right-wing nationalism. Only the advance of international human rights will move us beyond a world divided between those who have rights and those who don't.

Governing the World? Dec 26 2019 Problems posed by Syria's chemical weapons attacks, Egypt's ouster of an elected government, and myriad other global dilemmas beg the question of whether and how the world can be governed. The challenge is addressing what former UN Secretary-General Kofi Annan called Problems without Passports environmental, economic, humanitarian, and political crises that threaten stability, prosperity, and even human survival. Everything is globalized everything "except" politics, which remain imprisoned behind national borders. The world has changed, but our basic way of managing it has not. We pursue fitful, tactical, short-term, and local responses for actual or looming threats that require sustained, strategic, longer-run, and global actions. With clarity and passion, Thomas G. Weiss argues for a diversity of organizational arrangements some centralized, some decentralized and a plurality of problem-solving strategies some worldwide, some local. He proposes a three-pronged strategy: the expansion of the formidable amount of practical global governance that already exists, the harnessing of political and economic possibilities opened by the communications revolution, and the recommitment by states to a fundamental revamping of the United Nations."

Reveille in Revelation Apr 10 2021 The methodical procedure that God established through Adam from the beginning to grant knowledge to all homogenesis which he had created was to maintain equilibrium in the evolutions of the minds in two corridors for the indoctrinations: the natural and the spiritual; which in reality, are the Negative and the Positive of the one true God. He knew that in order for this to materialize there would have to be chastisements and incentives to bring man into his image; for this reason Adam was created to sow the seeds and permeate that knowledge into all mankind: and with his two sons, Cain and Abel, and the offerings they presented unto the lord it would enforce God's will to mental advancements in both corridors, for God was creating a people unto himself. This book reveals how man abuses all that God has given him. From the beginning of the word of God to the end his procedure would be the same until the later days when it would become more severe in both corridors culminating to a harvest of the earth to determine who shall preserve their life or who shall die: and the ending began with the crucifixion of his only begotten son Jesus, the Christ. How the ending should come about was first revealed to holy men of old: then to Daniel four hundred and ninety years before the Christ: and again to his servant John who wrote of the coming times in the book of Revelation of the Holy Bible: that we might prepare our selves for certain conditions Jesus revealed to his ministry, then written by the Apostles for us that we might be saved from the devastations of the generations of the harvest and the finalities..

Divided Loyalties Dec 06 2020 First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Organizing the 20th-Century World Mar 21 2022 International Organizations play a pivotal role on the modern global stage and have done, this book argues, since the beginning of the 20th century. This volume offers the first historical exploration into the formative years of international public administrations, covering the birth of the League of Nations and the emergence of the second generation that still shape international politics today such as the UN, NATO and OECD. Centring on Europe, where the multilateralization of international relations played out more intensely in the mid-20th century than in other parts of the world, it demonstrates a broad range of historiographical and methodological

approaches to institutions in international history. The book argues that after several 'turns' (cultural, linguistic, material, transnational), international history is now better equipped to restate its core questions of policy and power with a view to their institutional dimensions. Making use of new approaches in the field, this book develops an understanding of the specific powers and roles of IO-administrations by delving into their institutional make-up.

Spiritual Education in a Divided World Sep 27 2022 In the era of globalization debate has turned to the vital need for a thorough understanding of its impact on the spirituality and health of the youth of today. *Spiritual Education in a Divided World* recognises the urgent need for effective research in this area. This exceptional volume takes an interdisciplinary approach to tackle the key questions. Bringing together leading international experts, including Zygmunt and Mary Grey, the book combines research and training issues with practical professional experiences. The first section examines how globalized patterns of economics, conflict and consumerism are affecting the spirituality and imagination of children, young people and their families. In the second and third sections, practical responses from research and from professional experience are presented and critically evaluated. Readers in professions across teaching, youth work, social work, chaplaincy, nursing, mental health, as well as those concerned with community economics and environmental issues, will find in this volume an exciting, diverse and coherent collection of essays which offers wider perspectives on their work. This book was previously published as a special issue of *The International Journal of Children's Spirituality*.

Hard Lessons Feb 08 2021 Education is a basic condition for economic and social development. Working in conjunction with the National Primary Education Commission, the World Bank supported consultations among teachers, parents, educational administrators, and community leaders to develop a strong foundation for primary education in Nigeria. The innovative work documented in this publication illustrates the potential not only for partnership between the users and providers of primary education but also between the World Bank and its clients.

Hello, Stranger: Stories of Connection in a Divided World Jan 19 2022 We navigate our interactions with strangers according to a host of unwritten rules, rituals and (sometimes awkward) attempts at politeness. But what if the people we meet were not a problem, but a gift? When philosopher and traveller Will Buckingham's partner died, he sought solace in throwing open the door to new people. Now, as we reflect on our experiences of the pandemic and its enforced separations, and as global migration figures ever more prominently in our collective future, Buckingham brings together insights from philosophy, anthropology, history and literature to explore how our traditions of meeting the other can mitigate the issues of our time. Taking in stories of loneliness, exile and friendship from classical times to the modern day, and alighting in adapting communities from Birmingham to Myanmar, *Hello, Stranger* asks: how do we set aside our instinctive xenophobia - fear of outsiders - and embrace our equally natural philoxenia - love of strangers and newness?

We, the Divided Jun 19 2019 Cultural Writing. Political Science. Translated from the Italian by Jeremy Parzen Aaron Thomas. In this history of Italian culture and philosophy from the founding of the Italian Republic to the present day, philosopher Remo Bodei examines Italian society in one of the most exhilarating and intriguing periods of its history. Following World War II and the defeat of Fascism, the reconstruction of the country and onset of the Cold War brought new challenges to Italy. The Italian people--whose sense of national identity has always been precarious--were divided between the competing political passions and ideologies of Catholicism and Communism, and compelled to negotiate these differences against the backdrop of both American cultural and economic hegemony and the utopian enticements of a more equitable society purportedly represented by the Soviet Union. Alternating between imaginative historical research and sharp theoretical analysis, Bodei reconstructs this process of cultural negotiation, showing how the ethos of the Italian people was parsed in specific spheres, such as the

family, the military, political parties, religion, the judiciary, and organized crime. He examines both the ways in which philosophers have sought to make sense of the ethical and political problems the Italian people have had to confront, as well as the decisions effectively taken by individuals and groups. Bodei concludes with some reflections upon the difficulties and challenges that Italy faces in an increasingly interdependent world.

Electrochemistry in a Divided World Feb 20 2022 In this collection of interrelated essays, the authors review landmark developments in electrochemistry building on biographic material and personal insight. The book facilitates understanding of the innate pathways of developments in electrochemical science as a result of lucky circumstances fitting to objective conditions. Thus the book will help to understand the present state of electrochemistry and offer inspiration for solving today's scientific challenges. The authors as experienced electrochemists from the U.S., Western and Eastern Europe also provide guidance for scientific careers by presenting biographical examples of famous electrochemists.

Poetry in a Divided World Jun 24 2022 This book comprises four lectures presented at Trinity College in 1985 concerned with the function and status of poetry in the twentieth century.

Bridging the Global Digital Divide May 11 2021 According to many observers, the global digital divide - the extent to which information technology is benefiting developed as opposed to developing countries - has already established itself as the single most pervasive theme of the twenty-first century. The purpose of this book is to explore some of the ways in which this divide can be overcome both within and between nations. Employing a rigorous analytical framework, the author bases his analysis on the concept of international technological dualism. He argues that one possible solution to the problem is the availability of affordable technologies, such as low-cost computers, which are specifically designed for the income levels and socio-economic conditions of developing countries. He also emphasizes that the most important aim of any policy measure should be to provide universal access to information technologies, rather than individual ownership. Depending on whether or not this divide can be bridged will, to a large degree, determine whether developing countries are able to attain higher levels of productivity, prosperity and global integration.

The Solidarity of Others in a Divided World May 23 2022 Using the paradigm of "solidarity of others" as the central theme of theology, this book shows that it is possible to renew the doctrine of the Holy Spirit as the Spirit of solidarity and recapture the potential of the "body of Christ" as embodiment of this solidarity.

Being (the Church) Beyond the South-North-divide Jul 21 2019 This book testifies to the fact that the embodiment of ideas of partnership can occur in many ways. Contributors from South Africa and Germany engage in a search for identities in othernesses and for common ground beyond the divide. Seventeen contributions address a variety of partnership-related issues, ranging from ecumenical hermeneutical foundations to practical applications. Andrea Frchtling is teacher in Celle, Germany. Ndanganeni Phaswana is a bishop in the Evangelical Lutheran Church in Southern Africa-Central Diocese.

The Ordinary Virtues Nov 24 2019 During a 3-year, 8-nation journey, Michael Ignatieff found that while human rights is the language of states and liberal elites, the moral language that resonates with most people is that of everyday virtues: tolerance, forgiveness, trust, and resilience. These ordinary virtues are the moral system of global cities and obscure shantytowns alike.

The Cultural World of Jesus Oct 04 2020 The fifty-six essays in this book present cultural reflections on the gospel reading assigned for each Sunday in Cycle A of the Roman Lectionary. Each essay highlights aspects of the first-century, Eastern Mediterranean cultural world in which Jesus lived and suggests a cross-cultural comparison with contemporary Western culture. With this background information, readers can make more fitting applications of the Scripture to modern life situations. Used as an aid in preaching, Lectionary-based catechesis, or Scripture study, or for the interest and knowledge it brings, *The Cultural World of Jesus* will add form and substance to your understanding of the Word that

dwelt among us.? Subsequent volumes will cover the Gospels for Cycle B and C.?... an invaluable resource for preachers, and very interesting for anyone seeking deeper insight into the gospel.? AIM?Homilists on the lookout for a fresher approach to interpreting the lectionary texts will enjoy this book.? The Bible Today

Bridging Divided Worlds Jun 12 2021 Just about all religious communities have to confront the tension between generations—such as the pre-boomers, baby boomers, and gen Xers—who all bring their unique understandings of faith, various levels of religious literacy, and different expectations of what a church or synagogue should be and do in the lives of its members. Now *Bridging Divided Worlds* by Jackson W. Carroll and Wade Clark Roof—two experts in the field of contemporary religion—presents a comprehensive study of generational dynamics within congregations. Their groundbreaking work analyzes the crucial role the generations play in reshaping the American religious landscape. Throughout the book the authors examine current religious and spiritual trends and reveal how these changes can offer opportunities for enriching a congregation's faith and spiritual life. *Bridging Divided Worlds* offers an insightful analysis of how congregations have historically adapted to change and reveals how various contemporary groups of congregants have dealt with change in recent years. For example, the authors profile three types of congregations: inherited congregations (practices are guided by the past); blended congregations (practices honor inherited tradition and are attentive to generational diversity); and generation-specific congregations (practices are tailored to the needs of a particular generation). With these profiles the authors provide commentary on the strengths and weaknesses of each. In addition to its wealth of information and commentary, this indispensable resource shows how congregations are discovering ways to bridge the gaps and connect the different worlds the generations inhabit to create stronger, richer, and more vibrant religious communities.
