Strategic Management Mar 12 2021 Strategic Management delivers an insightful and concise introduction to strategic management concepts utilizing a strong mix of real-world contemporary examples. Written in a conversational style, this product sparks ideas, fuels creative thinking and discussion, while engaging students with the concepts they are studying.
National Library of Medicine Current Catalog Aug 24 2019
A House Divided Jul 24 2019 This anthology brings together under one cover the most important abolitionist and--unique to this volume-- proslavery documents written in the United States between the American Revolution and the Civil War. It makes accessible to students, scholars, and general readers the breadth of the slavery debate. Including many previously inaccessible documents, A House Divided is a critical and welcome contribution to a literature that includes only a few volumes of antislavery writings and no volumes of proslavery documents in print. Mason Lowance's introduction is an excellent overview of the antebellum slavery debate and its key issues and participants. Lowance also introduces each selection, locating it historically, culturally, and thematically as well as linking it to other writings. The documents represent the full scope of the varied debates over slavery. They include examples of race theory, Bible-based arguments for and against slavery, constitutional analyses, writings by former slaves and women's rights activists, economic defenses and critiques of slavery, and writings on slavery by such major writers as William Lloyd Garrison, John Greenleaf Whittier, Walt Whitman, Henry David Thoreau, and Ralph Waldo Emerson. Together they give readers

a real sense of the complexity and heat of the vexed conversation that increasingly dominated American discourse as the country moved from early nationhood into its greatest trial.

Criminality and Business Strategy Jun 22 2019 Criminality and Business Strategy: Similarities and Differences explores what can be learned from criminal organizations on four continents based on comparisons of their historical and cultural origins, chosen governance and power structures, and business models. It discusses how these contexts determined their applications of the principles and practice of effective, but amoral leadership, and whether these lessons can be applied to legitimate business enterprises. In this book John Zinkin and Chris Bennett argue that defining a "crime" is a contested issue and that criminality can be viewed as a spectrum, comprising a range of different types of crimes, the harms caused, and the variety of punishments involved. They discuss the critical role of the state in determining where criminality is perceived to sit on the crime continuum. The authors delve into how the state and organized crime are natural competitors, and how organized crime and legitimate businesses are subject to many of the same internal and external strategic considerations. They contend that the resulting similarities between criminality in organized criminal organizations and legitimate businesses are greater than the differences and that the differences are only in degree and not in kind. This thought-provoking study of criminality will be of immense interest to professionals, coaches, consultants, and academics interested in the techniques and ethics of leadership. The book is, in effect, the result of an intellectual journey of the authors from the ideas presented in their earlier book, The

Principles and Practice of Effective Leadership, to the issues in this book discussing important, difficult, and contested subjects. The journey continues in their third book: The Challenge in Leading Ethical and Successful Organizations.
1979-1990 Aug 17 2021
Geology and America's National Park Areas Mar 31 2020 The book also contains a comprehensive glossary and index. The last chapter takes a look at many of the sites preserving ancient cultural remains in the southwest, and some of the many forts and battlefields of different ages in the east and southeast.

Accounting Information Systems Jun 26 2022 Owners and managers rely on today's accounting professional to identify and monitor enterprise risks and to provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS, 10E focuses on three critical accounting information systems in use today: enterprise systems, e-Business systems, and

controls for maintaining those systems. The text fully explores the integrated nature of AIS with its foundations in information technology, business processes, strategic management, security, and internal controls. Students will easily grasp even the most challenging subjects as they explore today's most intriguing AIS topics discussed in a conversational and relaxed tone rather than complex technical language. The tenth edition provides students with the necessary tools for organizing and managing information to help them succeed and protect the integrity of their employer's information system. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Introduction to Information Retrieval Jan 10 2021 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Advances in Multilingual and Multimodal Information Retrieval Oct 07 2020 This book constitutes the thoroughly refereed proceedings of the 8th Workshop of the Cross-Language Evaluation Forum, CLEF 2007, held in Budapest, Hungary, September 2007. The revised and extended papers were carefully reviewed and selected for inclusion in the book. There are 115 contributions in total and an introduction. The seven distrinct evaluation tracks in CLEF 2007, are designed to test the performance of a wide range of multilingual information access systems or system components. The papers are organized in topical sections on Multilingual Textual Document Retrieval (Ad Hoc), Domain-Specific Information Retrieval (Domain-Specific), Multiple Language Question Answering (QA@CLEF), cross-language retrieval in image collections (Image CLEF), cross-language speech retrieval (CL-SR), multilingual Web retrieval (WebCLEF), cross-language geographical retrieval (GeoCLEF), and CLEF in other evaluations.

New Frontiers for Metrology: From Biology and Chemistry to Quantum and Data Science Jul 28 2022 The use of standard and reliable measurements is essential in many areas of life, but nowhere is it of more crucial importance than in the world of science, and physics in particular. This book contains 20 contributions presented as part of Course 206 of the International School of Physics Enrico Fermi on New Frontiers for Metrology: From Biology and Chemistry to Quantum and Data Science, held in Varenna, Italy, from 4 -13 July 2019. The Course was the 7th in the Enrico Fermi series devoted to metrology, and followed a milestone in the history of measurement: the adoption of new definitions for the base units of the SI. During the Course, participants reviewed the decision and discussed how the new foundation for metrology is opening new possibilities for physics, with several of the lecturers reflecting on the implications for an easier exploration of the unification of quantum mechanics and gravity. A wide range of other topics were covered, from measuring color and appearance to atomic weights and radiation, and including the application of metrological principles to the management and interpretation of very large sets of scientific data and the application of metrology to biology. The book also contains a selection of posters from the best of those presented by students at the Course. Offering a fascinating exploration of the latest thinking on the subject of metrology, this book will be of interest to researchers and practitioners from many fields.

Medical Data Analysis Oct 31 2022 The 2nd International Symposium on Medical Data Analysis (ISMDA 2001) was the continuation of the successful ISMDA 2000, a conference held in Fra-furt, Germany, in September 2000. The ISMDA conferences were conceived to integrate interdisciplinary research from scienti?c ?elds such as statistics, s- nal processing, medical informatics, data mining, and biometrics for biomedical data analysis. A number of academic and professional people from those ?elds, including computer scientists, statisticians, physicians, engineers, and others, - alized that new approaches were needed to apply successfully all the traditional techniques, methods, and tools of data analysis to medicine. ISMDA 2001, as its predecessor, aimed to provide an international forum for sharing and exchanging original research ideas and practical development ex- riences. This year we broadened the scope of the conference, to included methods for image analysis and bioinformatics. Both are exciting scienti?c research ?elds and it was clear to the scienti?c committee that they had to be included in the areas of interest. Medicine has been one of the most di?cult application areas for computing. The number and importance of the di?erent issues involved suggests why many data analysis researchers ?nd the medical domain such a challenging ?eld. New interactive approaches are needed to solve these problems.

Master Potter of Meiji Japan Oct 26 2019 This is a study of the life and works of Makuzu Kozan (1842-1916). It traces the influences on his work and relates developments in Makuzu ware to the work of other major potters of the era to provide an insight into this formative transitional era in the history of Japanese ceramics.
