Godfrey of Viterbo and his Readers Oct 22 2019 This collection provides a systematic survey of the wide readership the works of Godfrey of Viterbo enjoyed in the late Middle Ages. In the last years of the twelfth century this chronicler and imperial notary wrote a series of historical collections that gained considerable and lasting popularity: between the thirteenth and fifteenth centuries, his works were copied in elaborate manuscripts in almost all of Latin Europe. This wide distribution is particularly surprising for an author like Godfrey whom modern historians have never credited with any importance at all, as they considered his works chaotic and historically unreliable. Yet Godfrey was certainly one of the most daring historiographers of his time. In his works, the lineage of the Hohenstaufen emperors Frederick Barbarossa and Henry VI is traced directly to Charlemagne and Augustus, to the kings of Troy and of the Old Testament, and to Jupiter and everyone who, in his view, wielded imperial power in the past. Godfrey was a herald of the new political ideas the Hohenstaufen developed after the years of defeat against the papacy and the Italian communes, but also a universal chronicler whose interests reached far beyond the political issues of his day. Bringing together a group of specialists on manuscripts and historical writing in late medieval England, Spain, Italy, Germany, Bohemia and Poland, this volume aims to revive Godfrey's reputation by demonstrating how his works were understood by medieval readers.

Cloud-Based Benchmarking of Medical Image Analysis Jul 19 2019 This book is open access under a CC BY-NC 2.5 license. This book presents the VISCERAL project benchmarks for analysis and retrieval of 3D medical images (CT and MRI) on a large scale, which used an innovative cloud-based evaluation approach where the image data were stored centrally on a cloud infrastructure and participants placed their programs in virtual machines on the cloud. The book presents the points of view of both the organizers of the VISCERAL benchmarks and the participants. The book is divided into five parts. Part I presents the cloud-based benchmarking and Evaluation-as-a-Service paradigm that the VISCERAL benchmarks used. Part II focuses on the datasets of medical images annotated with ground truth created in VISCERAL that continue to be available for research. It also covers the practical aspects of obtaining permission to use medical data and manually annotating 3D medical images efficiently and effectively. The VISCERAL benchmarks are described in Part III, including a presentation and analysis of metrics used in evaluation of medical image analysis and search. Lastly, Parts IV and V present reports by some of the participants in the VISCERAL benchmarks, with Part IV devoted to the anatomy benchmarks and Part V to the retrieval benchmark. This book has two main audiences: the datasets as well as the segmentation and retrieval results are of most interest to medical imaging researchers, while eScience and computational science experts benefit from the insights into using the Evaluation-as-a-Service paradigm for evaluation and benchmarking on huge amounts of data.

Hollywood Mar 07 2021 'Hollywood' as a concept applies variously to a particular film style, a factory-based mode of film production, a cartel of powerful media institutions and a national (and increasingly global) 'way of seeing'. It is a complex social, cultural and industrial phenomenon and is arguably the single most important site of cultural production over the past century. This collection brings together journal articles, published essays, book chapters and excerpts which explore Hollywood as a social, economic, industrial, aesthetic and political force, and as a complex historical entity.

Max Weber May 21 2022 Max Weber was one of the most influential and creative intellectual forces of the twentieth century. In his methodology of the social sciences, he both exposed the flaws and solidified the foundations of the German historical tradition. Throughout his life, he saw bureaucracy as a serious obstacle to cultural vitality but as an inescapable part of organizational rationality. And in his most famous essay, on the Protestant ethic, he uncovered the psychological underpinnings of capitalism and modern occupational life. This searching work offers the first comprehensive introduction to Weber's thought for students and newcomers. Fritz Ringer locates Weber in his historical context, relating his ideas to the controversies and politics of his day. Ringer also considers the importance of Weber to contemporary life, discussing his insights into the limits of scholarly research and the future of Western capitalist societies. Weber, Ringer reminds us, believed in democracy, liberalism, and fundamental human rights; his ethic of responsibility remains as vital to our historical moment as it was to his own. A concise and incisive look at the man and personality behind the thought, Max Weber is a masterful outing in intellectual biography and social theory.
