2014 International Conference on Computer, Network Sep 27 2022 The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research achievements with each other. It has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority.

East Asia and Pacific Economic Update April 2014 Jun 19 2019 Developing countries in the East Asia Pacific region will see stable economic growth this year, bolstered by a recovery in high-income economies and the market's modest response so far to the Federal Reserve's tapering of its quantitative easing, according to the East Asia Pacific Economic Update. Developing East Asia will grow by 7.1 percent this year, largely unchanged from 2013, the report says. As a result, East Asia remains the fastest growing region in the world, despite a slowdown from the average growth rate of 8.0 percent from 2009 to 2013. In China, growth will ease slightly, to 7.6 percent this year from 7.7 percent in 2013. Excluding China, the developing countries in the region will grow by 5.0 percent, slightly down from 5.2 percent last year.

Integrating Sustainability Thinking in Science and Engineering Curricula Mar 29 2020 Including considerations of sustainability in universities' activities has long since become mainstream. However, there is still much to be done with regard to the full integration of sustainability thinking into science and engineering curricula. Among the problems that hinder progress in this field, the lack of sound information on how to actually implement it is prominent. Created in order to address this need, this book presents a wealth of information on innovative approaches, methods and tools that may be helpful in translating sustainability principles into practice.

Merchant Prince and Master Builder Oct 24 2019 **MERCHANT PRINCE AND MASTER BUILDER:** Edgar J. Kaufmann and Frank Lloyd Wright examines the extraordinary relationship between one of the nation's leading retailers in the mid-twentieth century and its best-known architect. Over a span of twenty-five years, from 1934 to 1959, Kaufmann, his wife, Liliane, and their son, Edgar Kaufmann jr., commissioned a dozen projects from Wright, including the famous country house, Fallingwater, and unrealized schemes for a civic center in Pittsburgh. The Kaufmanns shared Wright's belief in the power of good design to enrich the quality of modern life. Through Kaufmann's department store in Pittsburgh and Kaufmann jr.'s association with the Museum of Modern Art in New York, they promoted the work of Wright and other progressive designers from the United States, Scandinavia, Central Europe, and Latin America. Their story broadens the context for understanding Wright's career during the final decades of his life.

Land Reforms in India Dec 06 2020 This is the tenth volume in a major series which studies the status of land reforms throughout the country. It examines the progress achieved and the difficulties encountered in the computerisation of land records in various states. In 1988, the central government sponsored the Computerisation of Land Records (CoLR) scheme to tackle the recurring problems thrown up by inadequate land records system. Providing a critical appraisal of CoLR, the 20 articles in the volume are divided into three sections: Computerisation of Land Records; Digitisation of Cadastral Maps; and Land Information System. Based on empirical data and field studies, this volume is an important contribution towards understanding the socio-economic realities and social dynamics of contemporary India in the framework of land reforms.

The Algorithmic Foundations of Differential Privacy Nov 24 2019 The

problem of privacy-preserving data analysis has a long history spanning multiple disciplines. As electronic data about individuals becomes increasingly detailed, and as technology enables ever more powerful collection and curation of these data, the need increases for a robust, meaningful, and mathematically rigorous definition of privacy, together with a computationally rich class of algorithms that satisfy this definition. Differential Privacy is such a definition. The Algorithmic Foundations of Differential Privacy starts out by motivating and discussing the meaning of differential privacy, and proceeds to explore the fundamental techniques for achieving differential privacy, and the application of these techniques in creative combinations, using the query-release problem as an ongoing example. A key point is that, by rethinking the computational goal, one can often obtain far better results than would be achieved by methodically replacing each step of a non-private computation with a differentially private implementation. Despite some powerful computational results, there are still fundamental limitations. Virtually all the algorithms discussed herein maintain differential privacy against adversaries of arbitrary computational power -- certain algorithms are computationally intensive, others are efficient. Computational complexity for the adversary and the algorithm are both discussed. The monograph then turns from fundamentals to applications other than query-release, discussing differentially private methods for mechanism design and machine learning. The vast majority of the literature on differentially private algorithms considers a single, static, database that is subject to many analyses. Differential privacy in other models, including distributed databases and computations on data streams, is discussed. The Algorithmic Foundations of Differential Privacy is meant as a thorough introduction to the problems and techniques of differential privacy, and is an invaluable reference for anyone with an interest in the topic.

Attack Surface Jan 19 2022 Cory Doctorow's Attack Surface is a standalone novel set in the world of New York Times bestsellers Little Brother and Homeland. Most days, Masha Maximow was sure she'd chosen the winning side. In her day job as a counterterrorism wizard for an transnational cybersecurity firm, she made the

hacks that allowed repressive regimes to spy on dissidents, and manipulate their every move. The perks were fantastic, and the pay was obscene. Just for fun, and to piss off her masters, Masha sometimes used her mad skills to help those same troublemakers evade detection, if their cause was just. It was a dangerous game and a hell of a rush. But seriously self-destructive. And unsustainable. When her targets were strangers in faraway police states, it was easy to compartmentalize, to ignore the collateral damage of murder, rape, and torture. But when it hits close to home, and the hacks and exploits she's devised are directed at her friends and family--including boy wonder Marcus Yallow, her old crush and archrival, and his entourage of naïve idealists--Masha realizes she has to choose. And whatever choice she makes, someone is going to get hurt. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
