The History and Philosophy of Astrobiology Apr 20 2022 Human beings have wondered about the stars since the dawn of the species. Does life exist out there - intelligent life, even - or are we alone? The quest for life in the universe touches on fundamental hopes and fears. It touches on the essence of what it means to formulate a theory, grasp a concept, and have an imagination. This book traces the history of the science of this area and the development of new schools in philosophy. Its essays seek to establish the history and philosophy of astrobiology as research fields in their own right by addressing cognitive, linguistic, epistemological, ethical, cultural, societal, and historical perspectives on astrobiology. The book is divided into three sections. The first (Cognition) focuses on the human mind and what it contributes to the search for life. It explores the emergence and evolution of terrestrial life and cognition and the challenges humans face as they reach to the stars. The essays raise philosophical questions, pose ethical dilemmas, and offer a variety of approaches, including one from cognitive zoology, in formulating a theory of the universal principles of intelligence, the limits of human conceptual abilities, and the human mind's encounter with the unknown. The second section (Communication) examines the linguistic and semiotic requirements for interstellar communication. What is needed for successful communication? Are there universal rules for success? What are the possible features - and limitations - of exolanguages? What is required for recognizing a message as a message? The third section (Culture) considers cultural and societal issues. It explores astrobiology's organization as a scientific discipline, its responsibilities to the public sphere, and its theological implications. It reviews the historically important panspermia hypothesis, along with the popularization of astrobiology and its ongoing institutionalisation. Through addressing these questions, we take our first steps in exploring the immense terra incognita of extraterrestrial life and the human mind.

Compared to Who? Oct 02 2020 See your body image struggles as issues of the heart—then find freedom from body insecurity using five biblically rooted steps! Are you tired of clichés like "It's what's on the inside that counts!" or "Just love your body!" which sound encouraging but don't really help your struggle? Then *Compared to Who?* is for you. It may not be grammatically correct, but it's one question every woman should ask as she wrestles issues like: •Am I enough? •Should I try to be more beautiful? •Will anyone ever love me? •Would my life be different if I looked different? Writing from her personal battle with weight and appearance, Heather will encourage you to see your body image struggles from a fresh perspective. Heather's humor and honesty will encourage you, while her practical, grace-based approach will offer a path to follow to find the freedom you crave.

Imagining Solar Energy Nov 03 2020 How has humanity sought to harness the power of the Sun, and what roles have literature, art and other cultural forms played in imagining, mythologizing and reflecting the possibilities of solar energy? What stories have been told about solar technologies, and

how have these narratives shaped developments in science and culture? What can solar power's history tell us about its future, within a world adapting to climate crisis? Identifying the history of capturing solar radiance as a focal point between science and the imagination, *Imagining Solar Energy* argues that the literary, artistic and mythical resonances of solar power - from the Renaissance to the present day - have not only been inspired by, but have also cultivated and sustained its scientific and technological development. Ranging from Archimedes to Isaac Asimov, John Dee to Humphry Davy, Aphra Behn to J. G. Ballard, the book argues that solar energy translates into many different kinds of power (physical, political, intellectual and cultural), and establishes for the first time the importance of solar energy to many literary and scientific endeavours.

Mirrors and Mirroring from Antiquity to the Early Modern Period Mar 19 2022 This volume examines mirrors and mirroring through a series of multidisciplinary essays, especially focusing on the intersection between technological and cultural dynamics of mirrors. The international scholars brought together here explore critical questions around the mirror as artefact and the phenomenon of mirroring. Beside the common visual registration of an action or inaction, in a two dimensional and reversed form, various types of mirrors often possess special abilities which can produce a distorted picture of reality, serving in this way illusion and falsehood. Part I looks at a selection of theory from ancient writers, demonstrating the concern to explore these same questions in antiquity. Part II considers the role reflections can play in forming ideas of gender and identity. Beyond the everyday, we see in Part III how oracular mirrors and magical mirrors reveal the invisible divine - prosthetics that allow us to look where the eye cannot reach. Finally, Part IV considers mirrors' roles in displaying the visible and invisible in antiquity and since.

Mirror Mirror Jun 10 2021 A lyrical work of stunning creative vision, *Mirror Mirror* is set in Renaissance Italy, where Gregory Maguire draws a connection between the poison apple in the original Snow White story and the Borgia family's well-known appetite for poisoning its foes. In *Mirror Mirror* Snow White is called Bianca de Nevada. She is born on a farm in Tuscany in 1495, and when she is seven, her father is ordered by the duplicitous Cesare Borgia to go on a quest to reclaim the relic of the original Tree of Knowledge, a branch bearing three living apples that are thousands of years old. Bianca is left in the care of her father's farm staff and the beautiful—and madly vain—Lucrecia Borgia, Cesare's sister. But Lucrecia becomes jealous of her lecherous brother's interest in the growing child and plots a dire fate for Bianca in the woods below the farm. There Bianca finds herself in the home of seven dwarves—the creators of the magic mirror—who await the return of their brother, the eighth dwarf, long gone on a quest of his own. In the evocative style of Maguire's earlier novels, *Mirror Mirror* is a fresh, compelling take on a beloved classic tale.

The SAGE Handbook of Film Studies Feb 06 2021 Written by a team of veteran scholars and exciting emerging talents, *The SAGE Handbook of Film Studies* maps the field internationally, drawing out regional differences in the way that systematic intellectual reflection on cinema and film has been translated into an academic discipline. It examines the conversations between Film Studies and its contributory disciplines that not only defined a new field of discourse but also modified existing scholarly traditions. It reflects on the field's dominant paradigms and debates and evaluates their continuing salience. Finally, it looks forward optimistically to the future of the medium of film, the institution of cinema and the discipline of Film Studies at a time when the very existence of film and cinema are being called into question by new technological, industrial and aesthetic developments.
