Applying Pharmacogenomics in Therapeutics Oct 12 2020 Recent advances in high-throughput gene sequencing and other omics biotechnologies have served as a springboard for the field of pharmacogenomics. Pharmacogenomics is now generally accepted as the major determinant of variable drug safety, efficacy, and cost-effectiveness. Therefore, widespread use of pharmacogenomics for patient care has become a

The Principal and School Improvement Jun 07 2020 This book investigates the localised effects of reform by exploring the impact of a school improvement policy agenda on the work of three experienced principals. It presents three longitudinal case studies within a shared specific leadership context in Queensland, Australia. The case studies enable an exploration of the way the principalship in this context has evolved over time, providing deep insights into the practices and beliefs of three experienced school leaders working in a period of rapid and urgent systemic reform. The nature of global reform policy borrowing means that the research and the findings within this monograph are relevant for international audiences. The book describes a new way to understand and theorise the effects of reform policies and associated pressures on school leaders. Using post-structural theory, it provides a better understanding of the specific effects of reform policy ensembles, particularly when combined with an analysis of the ways policy and discourse work together at a wider level to create an environment that disciplines the principalship. Further, it sheds lights on the means of complying with or contesting policy influences and how the work of leaders has changed over time.

Indigenous Pathways, Transitions and Participation in Higher Education Jul 29 2019 This book is open access under a CC BY 4.0 license. This book brings together contributions by researchers, scholars, policy-makers, practitioners, professionals and citizens who have an interest in or experience of Indigenous pathways and transitions into higher education. University is not for everyone, but a university should be for everyone. To a certain extent, the choice not to participate in higher education should be respected given that there are other avenues and reasons to participate in education and employment that are culturally, socially and/or economically important for society. Those who choose to pursue higher education should do so knowing that there are multiple pathways into higher education and, once there, appropriate support is provided for a successful transition. The book outlines the issues of social inclusion and equity in higher education, and the contributions draw on real-world experiences to reflect the different approaches and strategies currently being adopted. Focusing on research, program design, program evaluation, policy initiatives and experiential narrative accounts, the book critically discusses issues concerning widening participation.

Genetics? No Problem! Nov 12 2020 Shortlisted for the HE Bioscience Teacher of the Year Award 2019: Kevin O'Dell, Author of Genetics? No Problem! The analysis and interpretation of data is fundamental to the subject of genetics and forms a compulsory part of the undergraduate genetics curriculum. Indeed, the key skills that a genetics student requires are an ability to design and understand experimental strategies and to use problem-solving skills to interpret experimental results and data. Genetics? No Problem! provides students with a graded set of problems that aim to enthuse, challenge and entertain the reader. The book is divided into three sections – introductory; intermediate and advanced – each with 10 problems. For first level students there will be short genetics problems embedded in a wide range of scenarios, such as murder mysteries. As the book progresses, the stories will get longer and the science will get progressively more complex to challenge final year students and enable the reader to identify genetic disease in obscure organisms as well as designing and testing treatments and cures. Genetics? No Problem!: Takes a unique, innovative approach that provides students with a set of graded problems designed to develop both their skills, and their ability to tackle problems with confidence Includes problems embedded in a narrative, written in an interesting, informative and entertaining style by an Author with a proven track record in teaching, research and communication Is well illustrated in full colour throughout. The book will prove invaluable to all students of genetics across a range of disciplines needing to get to grips with the analysis and interpretation of data that is fundamental to the subject.

Japanese Contractors in Overseas Markets Aug 22 2021 This book explores the differences in cultural attributes and management factors to enable managers working for Japanese contractors to reduce misunderstandings and misinterpretations when communicating with project team members from different cultural backgrounds. It focuses on Japanese contractors operating in Singapore, since the Singapore construction industry has, for many years, been one of the largest overseas construction markets for the top-5 Japanese contractors. Using Hofstede ' s national cultural framework for the cultural studies in construction project management, it reveals various real-world management practices and discusses national cultural differences relating to managers working for Japanese contractors in Singapore as well as the communication weaknesses of current management practices and styles. The results presented provide useful lessons for Japanese contractors operating in Singapore, as well as other parts of the world, to bridge cultural and communication gaps.

Water, Rhetoric, and Social Justice Aug 02 2022 Water, Rhetoric, and Social Justice: A Critical Confluence examines how individuals and communities have responded on a global scale to present day water crises as matters of social justice, through oratory, mass demonstration, deliberation, testimony, and other rhetorical appeals. This book applies critical communication methods and perspectives to interrogate the pressing yet mind-boggling dilemma currently faced in environmental studies and policy: that clean water, the very stuff of life, which flows freely from the tap in affluent areas, is also denied to huge populations, materially and fluidly exemplifying the currents of justice, liberty, and equity. Contributors highlight discourse and water justice movements in nonofficial spheres from activists, artists, and the grassroots. In extending the technical, economic, moral, and political conversations on water justice, this collection applies special focus on the novel rhetorical concepts and responses not necessarily unique to but especially enacted in water justice situations. Scholars of rhetoric, sociology, activism, communication, and environmental studies will find this book particularly useful.

Bayesian Psychometric Modeling Mar 29 2022 A Single Cohesive Framework of Tools and Procedures for Psychometrics and Assessment Bayesian Psychometric Modeling presents a unified Bayesian approach across traditionally separate families of psychometric models. It shows that Bayesian techniques, as alternatives to conventional approaches, offer distinct and profound advantages in achieving many goals of psychometrics. Adopting a Bayesian approach can aid in unifying seemingly disparate—and sometimes conflicting—ideas and activities in psychometrics. This book explains both how to perform psychometrics using Bayesian methods and why many of the activities in psychometrics align with Bayesian thinking. The first part of the book introduces foundational principles and statistical

models, including conceptual issues, normal distribution models, Markov chain Monte Carlo estimation, and regression. Focusing more directly on psychometrics, the second part covers popular psychometric models, including classical test theory, factor analysis, item response theory, latent class analysis, and Bayesian networks. Throughout the book, procedures are illustrated using examples primarily from educational assessments. A supplementary website provides the datasets, WinBUGS code, R code, and Netica files used in the examples.

The Internet is Not the Answer Oct 04 2022 In this sharp and witty book, long-time Silicon Valley observer and author Andrew Keen argues that, on balance, the Internet has had a disastrous impact on all our lives. By tracing the history of the Internet, from its founding in the 1960s to the creation of the World Wide Web in 1989, through the waves of start-ups and the rise of the big data companies to the increasing attempts to monetize almost every human activity, Keen shows how the Web has had a deeply negative effect on our culture, economy and society. Informed by Keen's own research and interviews, as well as the work of other writers, reporters and academics, *The Internet is Not the Answer* is an urgent investigation into the tech world - from the threat to privacy posed by social media and online surveillance by government agencies, to the impact of the Internet on unemployment and economic inequality. Keen concludes by outlining the changes that he believes must be made, before it's too late. If we do nothing, he warns, this new technology and the companies that control it will continue to impoverish us all.

God's Answer to the Growing Crisis Jan 03 2020 The dramatic shifts seen over the last few years—from economic to political to moral to beyond—have set the stage for a crisis that will affect every sphere of society. But this crisis isn't just looming in the United States; all of humanity is at a crossroads like never before. Mike Bickle, director of the International House of Prayer of Kansas City, offers God's definitive answer to this approaching global crisis. He provides a fresh biblical perspective on: The agenda to secularize and de-Christianize America What the upsurge of secular humanism looks like The rise of ISIS and Islamic extremists The looming financial crisis Readers will overcome fear and confusion in the last days and learn to pray effectively for this nation and the world.

Re-Cording Lives Mar 17 2021 Administrative asylum procedures are permeated by tensions between rationalities of legality, efficiency, and deterrence in asylum casework and their various effects on cases. Based on ethnographic research in the Swiss asylum administration, this book unveils the pragmatics and politics of rendering asylum cases resolvable by re-cording the lives of applicants in terms of asylum. With his reading of power and agency in administrations, Ephraim Pörtner offers a critical view of the intricate relationship between practices of asylum casework and the governmental need to resolve claims of people seeking protection.
