The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

Talent Management: Recruitment Methodologies - an Overview Aug 20 2019 Research Paper (undergraduate) from the year 2008 in the subject Business economics - Personnel and Organisation, grade: 1.3, University of applied sciences, Munich, language: English, abstract: Employees take a centre stage in companies and play the essential role for business success. Hence, companies have the highest interest to recruit and keep high qualified manpower. In this study, an overview about recruitment methodologies is provided. Additionally, benefits and drawbacks of recruiting methods are analyzed and compared. Recruitment is the discovering and obtaining of potential applicants for actual or anticipated organizational vacancies. Except the recruiting methods applied, many factors could influence the recruiting efforts: image of the organization, attractiveness and nature of the job, internal policies, government requirements, and recruiting budget. There are a high number of recruiting methods which can be classified in different ways: active and passive, internal and external, print and digital methods. The principle sources of recruiting employees include internal search, advertisements (in print or digital media), employee referrals, employment agencies, educational institutions and unsolicited applicants. Recruitment alternatives such as temporary staffing services, employee leasing, and independent contractors can be used meaningfully to acquire the temporary manpower. Because of benefits and drawbacks of different recruiting methods, the task of HR management is to select and apply the right method for an efficient and effective recruiting. The recruiting

process provides a basis for the selection of the right candidate and should be well accomplished.

Health Care Staffing Services Certification Manual Sep 25 2022  
Will College Pay Off? Mar 27 2020 The decision of whether to go to college, or where, is hampered by poor information and inadequate understanding of the financial risk involved. Adding to the confusion, the same degree can cost dramatically different amounts for different people. A barrage of advertising offers new degrees designed to lead to specific jobs, but we see no information on whether graduates ever get those jobs. Mix in a frenzied applications process, and pressure from politicians for "relevant" programs, and there is an urgent need to separate myth from reality. Peter Cappelli, an acclaimed expert in employment trends, the workforce, and education, provides hard evidence that counters conventional wisdom and helps us make cost-effective choices. Among the issues Cappelli analyzes are: What is the real link between a college degree and a job that enables you to pay off the cost of college, especially in a market that is in constant change? Why it may be a mistake to pursue degrees that will land you the hottest jobs because what is hot today is unlikely to be so by the time you graduate. Why the most expensive colleges may actually be the cheapest because of their ability to graduate students on time. How parents and students can find out what different colleges actually deliver to students and whether it is something that employers really want. College is the biggest expense for many families, larger even than the cost of the family home, and one that can bankrupt students and their parents if it works out poorly. Peter Cappelli offers vital insight for parents and students to make decisions that both make sense financially and provide the foundation that will help students make their way in the world.
