Shape Theory Dec 18 2021 North-Holland Mathematical Library, Volume 26: Shape Theory: The Inverse System Approach presents a systematic introduction to shape theory by providing background materials, motivation, and examples, including shape theory and invariants, pro-groups, shape fibrations, and metric compacta. The publication first ponders on the foundations of shape theory and shape invariants. Discussions focus on the stability and movability of spaces, homotopy and homology pro-groups, shape dimension, inverse limits and shape of compacta, topological shape, and absolute neighborhood retracts. The text then takes a look at a survey of selected topics, including basic topological constructions and shape, shape dimension of metric compacta, complement theorems of shape theory, shape fibrations, and cell-like maps. The text ponders on polyhedra and Borsuk's approach to shape. Topics include shape category of metric compacta and metric pairs, homotopy type of polyhedra, and topology of simplicial complexes. The publication is a valuable source of data for researchers interested in the inverse system approach.

Project Scheduling Mar 29 2020 Project scheduling problems are, generally speaking, the problems of allocating scarce resources over time to perform a given set of activities. The resources are nothing other than the arbitrary means which activities complete for. Also the activities can have a variety of interpretations. Thus, project scheduling problems appear in a large spectrum of real-world situations, and, in consequence, they have been intensively studied for almost forty years. Almost a decade has passed since the multi-author monograph: R. Slowinski, J. Węglarz (eds.), Advances in Project Scheduling, Elsevier, 1989, summarizing the state-of-the-art across project scheduling problems, was published. Since then, considerable progress has been made in all directions of modelling and finding solutions to these problems. Thus, the proposal by Professor Frederick S. Hillier to edit a handbook which reports on the recent advances in the field came at an exceptionally good time and motivated me to accept the challenge. Fortunately, almost all leading experts in the field have accepted my invitation and presented their completely new advances often combined with expository surveys. Thanks to them, the handbook stands a good chance of becoming a key reference point on the current state-of-the-art in project scheduling, as well as on new directions in the area. The contents are divided into four parts. The first one, dealing with classical models -exact algorithms, is preceded by a proposition of the classification scheme for scheduling problems.

Opinion Mining in Information Retrieval Nov 17 2021 This book discusses in detail the latest trends in sentiment analysis, focusing on "how online reviews and feedback reflect the

opinions of users and have led to a major shift in the decision-making process at organizations." Social networking has become essential in today's society. In the past, people's decisions to buy certain products (and companies' efforts to sell them) were largely based on advertisements, surveys, focus groups, consultants, and the opinions of friends and relatives. But now this is no longer limited to one's circle of friends, family or small surveys; it has spread globally to online social media in the form of blogs, posts, tweets, social networking sites, review sites and so on. Though not always easy, the transition from surveys to social media is certainly lucrative. Business analytical reports have shown that many organizations have improved their sales, marketing and strategy, setting up new policies and making decisions based on opinion mining techniques.

The Lamp of Umm Hashim and other stories Mar 09 2021 Together with such figures as the scholar Taha Hussein, the playwright Tawfik al-Hakim, the short story writer Mahmoud Teymour and--of course--Naguib Mahfouz, Yahya Hakki belongs to that distinguished band of early writers who, midway through the last century, under the influence of Western literature, began to practice genres of creative writing that were new to the traditions of classical Arabic. In the first story in this volume, the very short "Story in the Form of a Petition, " Yahya Hakki demonstrates his ease with gentle humor, a form rare in Arabic writing. In the following two stories, "Mother of the Destitute" and "A Story from Prison, " he describes with typical sympathy individuals who, less privileged than others, somehow manage to scrape through life's hardships. The latter story deals with the people of Upper Egypt, for whom the writer had a special understanding and affection. It is, however, for the title story (in fact, more of a novella) of this collection that the writer is best known. Recounting the difficulties faced by a young man who is sent to England to study medicine and who then returns to Egypt to pit his new ideals against tradition, "The Lamp of Umm Hashim" was the first of several works in Arabic to deal with the way in which an individual tries to come to terms with two divergent cultures.
