The Handbook of Attitudes, Volume 1: Basic Principles Oct 22 2019 Attitudes are evaluations of people, places, things, and ideas. They help us to navigate through a complex world. They provide guidance for decisions about which products to buy, how to travel to work, or where to go on vacation. They color our perceptions of others. Carefully crafted interventions can change attitudes and behavior. Yet, attitudes, beliefs, and behavior are often formed and changed in casual social exchanges. The mere perception that other people favor something, say, rich people, may be sufficient to make another person favor it. People's own actions also influence their attitudes, such that they adjust to be more supportive of the actions. People's belief systems even change to align with and support their preferences, which at its extreme is a form of denial for which people lack awareness. These two volumes provide authoritative, critical surveys of theory and research about attitudes, beliefs, persuasion, and behavior from key authors in these areas. The first volume covers theoretical notions about attitudes, the beliefs and behaviors to which they are linked, and the degree to which they are held outside of awareness. It also discusses motivational and cultural determinants of attitudes, influences of attitudes on behavior, and communication and persuasion. The second volume covers applications to measurement, behavior prediction, and interventions in the areas of cancer, HIV, substance use, diet, and exercise, as well as in politics, intergroup relations, aggression, migrations, advertising, accounting, education, and the environment.

Theory Into Practice Dec 16 2021 Reflective journals have been used by post-secondary educators in a wide variety of teacher-training courses to encourage students to better understand the topics that they are studying. Reflective journals are often used in courses in which pre-service and in-service teachers are studying both the theoretical and practical aspects of the subject matter such as secondary teaching methods, language and literacy, teacher education, and outdoor education. While there are books on the market that address some facets of reflective journaling, there are no integrative books such as Reflective Journaling: Unlocking the Power and the Potential that are targeted specifically to pre-service and in-service teachers. There are few resources currently available to teachers wishing to use reflective journals that include: the theoretical underpinnings of reflection, the integration and impacts of research on the praxis of journaling in each chapter, and practical strategies for successful, fun journal writing for students. This book addresses this need by providing "full coverage" of using reflective journals as a pedagogical tool. Reflective Journaling: Unlocking the Power and the Potential includes four figures, 15 tables, 25 works of art, four cartoons, and 10 photos that enhance each chapter.

Yet literary, film, and video materials illuminate problems and suggest ideas to which teachers can actively respond. This book offers teacher educators a variety of resources for articulating a critical pedagogy and suggests an alternative to the technical, job training approach to teacher education by providing a unique educational curricula that illuminates issues of power, ideology, and culture.

Journal Keeping Jan 05 2021 ** By the authors of the acclaimed Introduction to Rubrics ** Major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool ** Will appeal to college faculty, administrators and teachers One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development—particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.
