Planetary Exploration and Science: Recent Results and Advances

Oct 24 2019 This contributed monograph is the first work to present the latest results and findings on the new topic and hot field of planetary exploration and sciences, e.g., lunar surface iron content and mare orientale basalts, Earth's gravity field, Martian radar exploration, crater recognition, ionosphere and astrobiology, Comet ionosphere,

exoplanetary atmospheres and planet formation in binaries. By providing detailed theory and examples, this book helps readers to quickly familiarize themselves with the field. In addition, it offers a special section on next-generation planetary exploration, which opens a new landscape for future exploration plans and missions. Prof. Shuanggen Jin works at the Shanghai Astronomical Observatory, Chinese Academy of Sciences, China. Dr. Nader Haghighipour works at the University of

Automated Reasoning with Analytic Tableaux and Related Methods Jul 21 2019 This book constitutes the refereed proceedings of the International Conference on Automated Reasoning with Analytic Tableaux and Related Methods, TABLEAUX 2000, held in St Andrews, Scotland, UK, in July 2000. The 23 revised full papers and 2 system descriptions presented were carefully reviewed and selected from 42 submissions. Also included are 3 invited lectures and 6 nonclassical system comparisons. All current issues surrounding the mechanization of reasoning with tableaux and similar methods are addressed - ranging from theoretical foundations to implementation, systems development, and applications, as well as covering a broad variety of logical calculi.

Smart Cities Aug 22 2019

Provides the foundations and principles needed for addressing the various challenges of developing smart cities. Smart cities are emerging as a priority for research and development across the world. They open up significant opportunities in several areas, such as economic growth, health, wellness, energy efficiency, and transportation, to promote the sustainable development of cities. This book provides the basics of smart cities, and it examines the possible future trends of this technology. Smart Cities: Foundations, Principles, and Applications provides a systems science perspective in presenting the foundations and principles that span multiple disciplines for the development of smart cities. Divided into three parts—foundations, principles, and applications—Smart Cities addresses the various challenges and opportunities of creating smart cities and all that they have to offer. It also covers smart city theory modeling and simulation.

examines case studies of existing smart cities from all around the world. In addition, the book: Addresses how to develop a smart city and how to present the state of the art and practice of them all over the world Focuses on the foundations and principles needed for advancing the science, engineering, and technology of smart cities—including system design, system verification, real-time control and adaptation, Internet of Things, and test beds Covers applications of smart cities as they relate to smart transportation/connected vehicle (CV) and Intelligent Transportation Systems (ITS) for improved mobility, safety, and environmental protection Smart Cities: Foundations, Principles, and Applications is a welcome reference for the many researchers and professionals working on the development of smart cities and smart city-related industries.

Transputer Research and Applications 5 Jun 12 2021

Parallel processing is now becoming a household word among computer researchers and designers. This work contains 29 contributions from leading experts in the field attending the 1992 NATUG conference.

Best Policy Practices for Promoting Energy Efficiency May 31 2020 This publication is prepared in the framework of the United Nations Development Account project “Promoting Energy Efficiency Investments for Climate Change Mitigation and Sustainable Development”, which is implemented jointly by all five UN Regional Commissions with UNECE as the lead agency. This publication highlights the best policy practices for promoting energy efficiency in UNECE region and beyond. The objective of the publication is to present a structured

framework of policies and measures to promote energy efficiency investments for climate change mitigation and sustainable development, as well as to develop a menu of energy efficiency policies and measures. Governments, business community, experts, project developers, and other stakeholders will find this publication to be a useful companion for understanding and applying the best policy practices in improving energy efficiency.

Urban Sustainability and River Restoration Sep 03 2020 **Urban Sustainability and River Restoration: Green and**

Blue Infrastructure considers the integration of green and blue infrastructure in cities as a strategy useful for acting on causes and effects of environmental and ecological issues. River restoration projects are unique opportunities for sustainable development and smart growth of communities, providing multiple environmental, economic, and social benefits. This book analyzes initiatives and actions carried out and developed to improve environmental conditions in cities and better understand the environmental impact of (and in) dense urban areas in the United States and in Europe.

*New Developments in Dam
Engineering* Oct 04 2020 The
development of water
resources is a key element in
the socio-economic
development of many regions
in the world. Water availability
and rainfall are unequally
distributed both in space and
time, so dams play a vital role,
there being few viable

alternatives for storing water.
Dams hold a prime place in
satisfying the ever-increasing
demand for power, irrigation
and drinking water, for
protection of man, property
and environment from
catastrophic floods, and for
regulating the flow of rivers.
Dams have contributed to the
development of civilization for
over 2,000 years. Worldwide
there are some 45,000 large
dams listed by ICOLD, which
have a height over 15 meters.
Today, in western countries,
where most of the water
resources have been
developed, the safety of the
existing dams and measures for
extending their economical life
are of prime concern. In
developing countries the focus
is on the construction of new
dams. The proceedings of the
4th International Conference
on Dam Engineering includes
contributions from 18
countries, and provides an
overview of the state-of-the-art
in hydropower development,
new type dams, new materials
and new technologies, dam and
environment. Trad

such as concrete dams and embankment dams, methods of analysis and design of dams, dam foundation, seismic analysis, design and safety, stability of dam and slope, dam safety monitoring and instrumentation, dam maintenance, and rehabilitation and heightening are also considered. The book is of special interest to scientists, researchers, engineers, and students working in dam engineering, dam design, hydropower development, environmental engineering, and structural hydraulics.

Motors Corporation and published by Detroit Iron. This OEM factory manual is 8.5 x 11 inches, paperback bound, shrink-wrapped and contains 524 pages of comprehensive assembly information for all components organized by UPC groupings which usually include groupings such as the engine, transmission, suspension, brakes, steering, frame, sheet metal, grille, doors, hood, windshield, etc. Assembly manuals were originally written as a set of engineering drawings by the automotive manufacturer to be used by their assembly line. The Factory Assembly Manual was never intended to be published to the public but many automotive restorers truly love the detail in the

manual. The following 1960-1966 GMC, Chevrolet models are covered: 1000 Series, 1500 Series, 2500 Series, Truck, Suburban, C10 Panel, C10 Pickup, C20 Pickup, C30 Panel, C30 Pickup, C40, C50, C60, C70, C80, K10 Pickup, K20 Pickup, 3000, 3500, 1000, 1500, 2500. This factory written Detroit Iron shop manual is perfect for the restorer or anyone working on one of these vehicles.
