We Have No Idea May 31 2022 In our small corner of the universe, we know how some matter behaves most of the time and what even less of it looks like, and we have some good guesses about where it all came from. But we really have no clue what's going on. In fact, we don't know what about 95% of the universe is made of. So what happens when a cartoonist and a physicist walk into this strange, mostly unknown universe? Jorge Cham and Daniel Whiteson gleefully explore the biggest unknowns, why these things are still mysteries, and what a lot of smart people are doing to figure out the answers (or at least ask the right questions). While they're at it, they helpfully demystify many complicated things we do know about, from quarks and neutrinos to gravitational waves and exploding black holes. With equal doses of humour and delight, they invite us to see the universe as a vast expanse of mostly uncharted territory that's still ours to explore. This is a book for fans of Brian Cox and What If. This highly entertaining highly illustrated book is perfect for anyone who's curious about all the great mysteries physicists are going to solve next.

The Best in the World Sep 22 2021 The two-time bestselling author, wrestler and metal rocker returns with another insightful and hilarious memoir. Inspired by Anton Chigurh, Javier Bardem's character in No Country for Old Men, Chris Jericho decided to put down his guitar, ease off on the red-carpet appearances in Hollywood and return to ring. What followed were the best three years of his wrestling career. A trilogy that began with A LION'S TALE and was followed by the bestselling UNDISPUTED now concludes with a behind-the-scenes account of Jericho becoming WON WRESTLER OF THE YEAR for two consecutive years in 2008 and 2009. The book also features the final word on Jericho's feuds with Shawn Michaels and Rey Mysterio, his run-in with Mickey Rourke, life hanging out with the likes of Ozzy Osbourne, Mike Tyson and Lars Ulrich, and the resurrection of his band Fozzy, which saw them play to huge audiences in the UK and Europe and support Metallica.

The Checklist Manifesto Jun 27 2019 The New York Times bestselling author of Being Mortal and Complications reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful

turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

How to Transform Your Ideas Into Software Products Oct 12 2020 Create products people will pay for before they're even built. You have an idea in your head. Maybe even more than one! But you're stuck simmering on it because you just don't know if it's the right one to pursue. You're wondering whether people will even use your product, let alone pay for it. The uncertainty is overwhelming, so you do ... nothing. But what if you were confident that your idea would help people? How would you feel if you turned your passion into a living, breathing software product ... and you made money from it? Poornima Vijayashanker has founded 3 startups and personally guided 100+ people who have launched products that make 6 and 7 figures per year. Everyone started with varying levels of technical and business know-how-or none at all-but everyone was passionate about an idea. Now, Poornima travels around the country teaching people how to bring their ideas to life. With the right roadmap in front of you, you can launch a winning software product too. "But I don't know how to code or run a business." The tangled world of startups and software development is intimidating and hard to navigate. To start with, not every entrepreneur knows how to code. Even the ones who do still need other skills to succeed; they need to design a good user experience, figure out how to attract paying customers, and hire and fire technical talent. There are hundreds of tools and services to help build products, and they need to know which ones are useless and which ones will save them time. They'll eventually run out of cash to keep paying rent and developing, and will need to figure out whether to get investors, apply to an accelerator, or bootstrap. Trial and error takes years of research, setbacks, and heartache ... not to mention a lot of money. You could go to design school, teach yourself how to code in the off-hours, and spend thousands of dollars testing marketing campaigns. Or you could... Follow a proven guide for turning your ideas into successful products (and even 6- to 7-figure businesses). This book will teach you how to: - Validate your idea before you spend time and money on it. - Talk to prospective customers without feeling awkward or pushy. - Leave competitors in the dust with good design and positioning. - Save time and heartache by building only the features people will actually use. - Hire talented people to build your product for you. - Get more paying customers with scrappy marketing strategies. - Find money to fund your business. This guide includes time-tested strategies and tools that entrepreneurs love: Over 13 case studies with the inside scoop on companies like Mint.com, AirBnB, and Zappos. The exact systems and tools Poornima and other startup founders have used to build rock-solid products. 7 interviews with successful startup founders and early employees like: - Melody McCloskey, CEO & Co-Founder of StyleSeat - Brittany Forsyth, Head of Human Relations at Shopify - Ben Congleton, CEO & Co-Founder of Olark - Julia Grace, Head of Engineering at Tindie - Thomson Nguyen, CEO & Co-Founder of Framed Data - Alyssa Ravasio, CEO & Co-Founder of Hipcamp - David Cummings, CEO & Co-Founder of Pardot

I Have an Idea! Nov 05 2022 From one of the true creative geniuses of this generation comes a unique meditation on and celebration of the magic of the birth of a simple idea. Sparkling with visual wit and bubbling with imagination, this is a richly emotional exploration of the creative process: from an initial tentative inkling, to the frustration of chasing the wrong notion, to finally the exhilaration of capturing—and nurturing—just the right idea. *I Have an Idea!* is a scrumptious cloth-spined package of color and inspiration equally at home on a child's bookshelf, in a new graduate's backpack, or atop a creative's desk.

Leviticus Apr 29 2022 Leviticus has been called "irrelevant," "primitive," and "a backwater" of the Bible, even by scholars and people of faith who treasure Scripture. Many find it alienating, or, at minimum, confusing. In *Leviticus: You Have No Idea* Rabbi Maurice D. Harris offers readers surprising new ways of looking at the Bible's least popular (and least understood) book. Grounded in his progressive religious values and beliefs, Rabbi Harris approaches the various laws, rituals, and stories of Leviticus with an open-minded curiosity about what we can learn today about life, ethics, God, and higher meaning by studying this text. Taking the Bible seriously but not literally, Harris uses a plain-spoken, accessible style to explain confusing elements of Leviticus. He explores topics that matter to many of us in contemporary society, including LGBT equality, the dangers of religious fundamentalism, the impacts of childhood trauma, criminal justice reform, and more. With this book, the author invites us into an ancient text that, read with care, challenges us to be better people and help repair this broken world.

The Role of Telehealth in an Evolving Health Care Environment Mar 05 2020 In 1996, the Institute of Medicine (IOM) released its report *Telemedicine: A Guide to Assessing Telecommunications for Health Care*. In that report, the IOM Committee on Evaluating Clinical Applications of Telemedicine found telemedicine is similar in most respects to other technologies for which better evidence of effectiveness is also being demanded. Telemedicine, however, has some special characteristics-shared with information technologies generally-that warrant particular notice from evaluators and decision makers. Since that time, attention to telehealth has continued to grow in both the public and private sectors. Peer-reviewed journals and professional societies are devoted to telehealth, the federal government provides grant funding to promote the use of telehealth, and the private technology industry continues to develop new applications for telehealth. However, barriers remain to the use of telehealth modalities, including issues related to reimbursement, licensure, workforce, and costs. Also, some areas of telehealth have developed a stronger evidence base than others. The Health Resources and Service Administration (HRSA)

sponsored the IOM in holding a workshop in Washington, DC, on August 8-9 2012, to examine how the use of telehealth technology can fit into the U.S. health care system. HRSA asked the IOM to focus on the potential for telehealth to serve geographically isolated individuals and extend the reach of scarce resources while also emphasizing the quality and value in the delivery of health care services. This workshop summary discusses the evolution of telehealth since 1996, including the increasing role of the private sector, policies that have promoted or delayed the use of telehealth, and consumer acceptance of telehealth. **The Role of Telehealth in an Evolving Health Care Environment: Workshop Summary** discusses the current evidence base for telehealth, including available data and gaps in data; discuss how technological developments, including mobile telehealth, electronic intensive care units, remote monitoring, social networking, and wearable devices, in conjunction with the push for electronic health records, is changing the delivery of health care in rural and urban environments. This report also summarizes actions that the U.S. Department of Health and Human Services (HHS) can undertake to further the use of telehealth to improve health care outcomes while controlling costs in the current health care environment.

Testing Business Ideas shows leaders how to encourage an experimentation mindset within their organization and make experimentation a continuous, repeatable process.

Tradition and Dissent Aug 29 2019 Writing is a craft as well as an art, and most students can learn to write with reasonable facility. The first part of this book is the rhetoric, and its first part aims at unlocking whatever verbal ability the student possesses, and moving to greater fluency. The second section of the rhetoric deals with the persuasive essay and is traditional in its treatment and progression. The reader contains selections designed to stimulate interest and response in the student. The readings range from the simple to the complex, and can serve as models for the rhetorical principles outlined earlier. The majority of the reading selections are accompanied by study questions, and each section of readings is followed by writing assignments.

Longman Collocations Dictionary and Thesaurus Feb 25 2022 This dictionary for intermediate-advanced level learners of English as a foreign language, combines a collocations (combination of words used) dictionary with a thesaurus, ensuring English learners choose the correct word and collocation every time.

Fluent Forever Dec 26 2021 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages." —Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Writing Without Bullshit Jan 03 2020 Joining the ranks of classics like *The Elements of Style* and *On Writing Well*, *Writing Without Bullshit* helps professionals get to the point to get ahead. It's time for *Writing Without Bullshit*. *Writing Without Bullshit* is the first comprehensive guide to writing for today's world: a noisy environment where everyone reads what you write on a screen. The average news story now gets only 36 seconds of attention. Unless you change how you write, your emails, reports, and Web copy don't stand a chance. In this practical and witty book, you'll learn to front-load your writing with pithy titles, subject lines, and opening sentences. You'll acquire the courage and skill to purge weak and meaningless jargon, wimpy passive voice, and cowardly weasel words. And you'll get used to writing directly to the reader to make every word count. At the center of it all is the Iron Imperative: treat the reader's time as more valuable than your own. Embrace that, and your customers, your boss, and your colleagues will recognize the power and boldness of your thinking. Transcend the fear that makes your writing weak. Plan and execute writing projects with confidence. Manage edits and reviews flawlessly. And master every modern format from emails and social media to reports and press releases. Stop writing to fit in. Start writing to stand out. Boost your career by writing without bullshit.

Working Out Ideas Apr 17 2021

Asylum Jan 15 2021 Alexis's long-awaited second novel follows his award-winning *Childhood*. Set in Ottawa during the Mulroney years, *Asylum* is André Alexis's sweeping, edged-in-satire, yet deeply serious tale of intertwined lives and fortunes, of politics and vain ambition, of the building of a magnificent prison, of human fallibility, of the search for refuge, of the impossibility of love, and of finding home. Whether he is taking us into the machinations of a government office or into the mysterious workings of the human heart, Alexis is always alert to the humour and the profound truth of any situation. His cast of characters is eccentric and unforgettable, all recognizable in one way or another as aspects of ourselves or people we know well. At the centre of the story, which covers almost a decade, is a visionary project to build an ideal prison, a perfect metaphor for the purest aspects of artistic ambition and for all that is great and flawed in the world. André Alexis is a true original, one of the most talented and astute writers writing in Canada today. This dazzling novel is filled with tragedy, dry wit, intellectual grist. It is playful, linguistically accomplished, and psychologically profound. Its yearnings constitute the highest level of human concerns and pursuits. Alexis has written *The Great Canadian Novel*, with a twist.

Machine Habitus Apr 05 2020 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Aioldi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the

generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

Idea to Invention Oct 24 2021 You don't have to be a mechanical genius to be an inventor. Chances are, you're already at the all-important starting ground every inventor begins at—wishing you could find a clever solution to an everyday challenge. The far-too-complicated baby swing. Slick-soled running shoes. Computer cords constantly tangled up . . . there can't be a solution unless there's a problem. And that's where you're at! Author and inventor Patricia Nolan-Brown has turned many common annoyances into ingenious and money-making products, and she believes you can do the same. In *Idea to Invention*, she shares the tricks of her trade in order to help ordinary people learn how to look at their world through the eyes of an inventor. Readers will learn the six simple steps it takes to go from idea to invention, and discover:

- Creativity habits that spark invention
- The power of tape-and-paper prototypes to refine their vision
- How to navigate the ins and outs of licensing and patenting their product
- The pros and cons of finding a licensed manufacturer vs. running a home-based assembly line
- How to promote their invention
- Product enhancements that add years to shelf life

And more! From the everyday challenge and your initial concept to resolve it, all the way to the explosion of your thriving business, this all-encompassing guide simplifies the invention process and gives creative thinkers the competitive edge they need to achieve the success their amazing ideas deserve.

The Scribe Method Aug 22 2021 Ready to write your book? So why haven't you done it yet? If you're like most nonfiction authors, fears are holding you back. Sound familiar? Is my idea good enough? How do I structure a book? What exactly are the steps to write it? How do I stay motivated? What if I actually finish it, and it's bad? Worst of all: what if I publish it, and no one cares? How do I know if I'm even doing the right things? The truth is, writing a book can be scary and overwhelming—but it doesn't have to be. There's a way to know you're on the right path and taking the right steps. How? By using a method that's been validated with thousands of other Authors just like you. In fact, it's the same exact process used to produce dozens of big bestsellers—including David Goggins's *Can't Hurt Me*, Tiffany Haddish's *The Last Black Unicorn*, and Joey Coleman's *Never Lose a Customer Again*. The Templeton Twins Have an Idea Sep 03 2022 This special edition of *The Templeton Twins Have an Idea: Book One* also includes a sneak preview of *The Templeton Twins Make a Scene: Book Two* and a Q&A with the author. Suppose there were 12-year-old twins, a boy and girl named John and Abigail Templeton. Let's say John was pragmatic and played the drums, and Abigail was theoretical and solved cryptic crosswords. Now suppose their father was a brilliant, if sometimes confused, inventor. And suppose that another set of twins—adults—named Dean D. Dean and Dan D. Dean, kidnapped the Templeton twins and their ridiculous dog in order to get their father to turn over one of his genius (sort of) inventions. Yes, I said kidnapped. Wouldn't it be fun to read about that? Oh please. It would so. Luckily for you, this is just the first in a series perfect for boys and girls who are smart, clever, and funny (just like the twins), and enjoy reading adventurous stories (who doesn't?!).

We Have No Idea Mar 29 2022 Prepare to learn everything we still don't know about our strange and mysterious universe. Humanity's understanding of the physical world is full of gaps. Not tiny little gaps you can safely ignore—there are huge yawning voids in our basic notions of how the world works. PHD Comics creator Jorge Cham and particle physicist Daniel Whiteson have teamed up to explore everything we don't know about the universe: the enormous holes in our knowledge of the cosmos. Armed with their popular infographics, cartoons, and unusually entertaining and lucid explanations of science, they give us the best answers currently available for a lot of questions that are still perplexing scientists, including: * Why does the universe have a speed limit? * Why aren't we all made of antimatter? * What (or who) is attacking Earth with tiny, superfast particles? * What is dark matter, and why does it keep ignoring us? It turns out the universe is full of weird things that don't make any sense. But Cham and Whiteson make a compelling case that the questions we can't answer are as interesting as the ones we can. This fully illustrated introduction to the biggest mysteries in physics also helpfully demystifies many complicated things we do know about, from quarks and neutrinos to gravitational waves and exploding black holes. With equal doses of humor and delight, Cham and Whiteson invite us to see the universe as a possibly boundless expanse of uncharted territory that's still ours to explore.

The Blank Slate Sep 30 2019 'A passionate defence of the enduring power of human nature ... both life-affirming and deeply satisfying' *Daily Telegraph* Recently many people have assumed that we are blank slates shaped by our environment. But this denies the heart of our being: human nature. Violence is not just a product of society; male and female minds are different; the genes we give our children shape them more than our parenting practices. To acknowledge our innate abilities, Pinker shows, is not to condone inequality, but to understand the very foundations of humanity. 'Brilliant ... enjoyable, informative, clear, humane' *New Scientist* 'If you think the nature-nurture debate has been resolved, you are wrong ... this book is required reading' *Literary Review* 'An original and vital contribution to science and also a rattling good read' *Matt Ridley, Sunday Telegraph* 'Startling ... This is a breath of air for a topic that has been politicized for too long' *Economist*

We Have No Idea Oct 04 2022 'This witty book reveals the humbling vastness of our ignorance about the universe, along with charming insights into what we actually do understand' Carlo Rovelli, author of *Seven Brief Lessons on Physics* and *Reality Is Not What It Seems* In our small corner of the universe, we know how some matter behaves most of the time and what even less of it looks like, and we have some good guesses about where it all came from. But we really have no clue what's going on. In fact, we don't know what about 95% of the universe is made of. So what happens when a cartoonist and a physicist walk into this strange, mostly unknown universe? Jorge Cham and Daniel Whiteson gleefully explore the biggest unknowns, why these things are still mysteries, and what a lot of smart people are doing to figure out the answers (or at least ask the right questions). While they're at it, they helpfully demystify many complicated things we do know about, from quarks and neutrinos to gravitational waves and exploding black holes. With equal doses of humour and delight, they invite us to see the universe as a vast expanse of mostly uncharted territory that's still ours to explore. This is a book for fans of Brian Cox and *What If*. This highly entertaining highly illustrated book is perfect for anyone who's curious about all the great mysteries physicists are going to solve next.

Transforming an Idea Into a Business with Design Thinking Jul 21 2021 We are living in fascinating times, when the power of technology is not just reshaping, but is transforming the globe in unprecedented ways. These include the ability to connect with anyone across the globe in an instant using a tiny device in the palm of our hands to the availability of self-learning systems to take over, not only the most mundane of tasks, but the most sophisticated tasks previously thought to be performable only by superior human faculties. Regardless of whether you consider this progress to be beneficial to society or harmful, these technological advancements are here to stay. On one hand, these current transformational technological advancements threaten this stability of society. On the other hand, they present an opportunity for all of us to awaken our inner entrepreneurs. This book makes the transition from an employee to an entrepreneur smooth for the masses. Many of us have ideas to improve this world in some way and even feel strongly about some of those ideas at a deeper level. However, we find ourselves perplexed on two levels: 1. Where to start when building an idea into a business? 2. What are the various dimensions and activities needed to launch an idea into a business? This book will introduce you to a structured framework, called Transform3+1, to transform your idea into a business by following simple and specific steps spread across four stages. The framework is grounded in the belief that all solutions solve human problems using technology or otherwise. The first stage will help you understand the problem facing your target user by building empathy. Once you understand the problem, comes the stage of devising a solution in an iterative manner through prototyping the new concept and validating with the user. Most start-ups fail not because they didn't find the right problem to solve for the target user or that their solution lacked technological prowess but because they could not figure out a sustainable business model. Third stage will focus on crafting a business model. And the final stage introduces you to a unique approach of managing risk associated with your venture. This unique framework leverages the principles of Design Thinking, agile development, and lean start-up combined in an easy to follow manner by anyone and helps transform ideas into business in a short timeframe with little or no investment.

Biology Of Enlightenment Feb 02 2020 In this book we meet with the modern sage, U.G. Krishnamurti, and listen to his penetrating voice describing life and reality as it is. What is body and what is mind? Is there a soul? Is there a beyond, a God? What is enlightenment? Is there a life after death? Never before have these questions been tackled with such simplicity, candour and clarity. In these unpublished early conversations with friends (1967-71), U.G. discusses in detail his search for the truth and how he underwent radical biological changes in 1967. Preferring to call it the natural state over enlightenment, he insists that whatever transformation he has undergone is within the structure of the human body and not in the mind at all. It is the natural state of being that sages like the Buddha, Jesus and, in modern times, Sri Ramana, stepped into. And U.G. never tires of pointing out that 'this is the way you, stripped of the machinations of thought, are also functioning.'

Who Thought This Was a Good Idea? Jan 27 2022 New York Times bestseller! If your funny older sister were the former deputy chief of staff to President Barack Obama, her behind-the-scenes political memoir would look something like this... Alyssa Mastromonaco worked for Barack Obama for almost a decade, and long before his run for president. From the then-senator's early days in Congress to his years in the Oval Office, she made Hope and Change happen through blood, sweat, tears, and lots of briefing binders. But for every historic occasion-meeting the queen at Buckingham Palace, bursting in on secret climate talks, or nailing a campaign speech in a hailstorm-there were dozens of less-than-perfect moments when it was up to Alyssa to save the day. Like the time she learned the hard way that there aren't nearly enough bathrooms at the Vatican. Full of hilarious, never-before-told stories, **WHO THOUGHT THIS WAS A GOOD IDEA?** is an intimate portrait of a president, a book about how to get stuff done, and the story of how one woman challenged, again and again, what a "White House official" is supposed to look like. Here Alyssa shares the strategies that made her successful in politics and beyond, including the importance of confidence, the value of not being a jerk, and why ultimately everything comes down to hard work (and always carrying a spare tampon). Told in a smart, original voice and topped off with a couple of really good cat stories, **WHO THOUGHT THIS WAS A GOOD IDEA?** is a promising debut from a savvy political star.

Surge Jul 09 2020 How many times have you had an idea that you were really passionate about-one that you really believed was important? How many times have you waited until you had the perfect amount of time or the perfect environment or the perfect set of

circumstances to act on that idea? How many times have your ideas vanished into thin air because those "perfect" opportunities never came? No more. We've been on a two-decade quest to find better ways to take action on our ideas--and share those strategies with others. In this book, you'll learn exactly how to harness the power of now to take action on your ideas. You'll learn how to alleviate anxiety, face your fears, and overcome overwhelm--all so you can bring your ideas to life.

God's Feminist Movement Jul 29 2019 Experience True Liberation by Seeing Your Beauty, Femininity, and Freedom From Heavens Point of View Has Christianity kept women trapped in the stone age? In many ways, yes; but this is not by Gods design. As society offers women opportunities to explore outer-space and govern nations, the church often stifles and limits them. The tide is changing, though. Amber Picotas Gods Feminist Movement is a new covenant manifesto calling women to embrace their true identity in Christ and fulfill their destiny as revolutionaries who shape the course of history with the Kingdom of God. There is a powerful new feminist movement emerging in the body of Christ. Its not politically driven and its not being championed by an uprising of angry man-haters. Based on an intense study of Scripture, factoring in historical and contextual hermeneutics and original languages, Picota shares a practical, non-legalistic, and non-traditional (yet deeply Biblical) look at topics that women commonly face, such as: Dating and Modesty Female Leaders in the Church Submission in Marriage Beauty and Self-Image Celebrate the power and beauty of womanhood. God has given you permission to change the world by being you! Break off religious traditions that keep women trapped in old school legalism and move beyond Christian clichés that minimize a womans true position in Christ!

The Second Media Age May 07 2020 This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age".
